

METabolic EXplorer selected for EnterNext's new "Tech 40" label

Clermont-Ferrand, 28 April 2015 – METabolic EXplorer, a biological chemistry company that specialises in developing manufacturing bioprocesses for the bio-based compounds used in a wide range of everyday products, including textile fibres, animal feed and resins, today informs:

As part of the launch of the new Tech 40 label by EnterNext, a subsidiary of Euronext, METabolic EXplorer is announcing that it has been included in the new benchmark index composed of 40 innovative companies in France.

Selected by a committee of independent European experts on the basis of economic, financial and market performance, the 40 businesses will have access to special promotion and support resources bringing them heightened visibility, notably with investors. The resources include participation in an international roadshow programme, access to the "Tech 40" club and participation in events featuring leading lights in the sector.

METabolic EXplorer, already included in the CAC Small indices, is proud to have been chosen as part of the new Tech 40 label comprising leading companies in eco-manufacturing, TMT and the life sciences.

About METabolic EXplorer - www.metabolic-explorer.com

METabolic EXplorer is a biological chemistry company which was incorporated in 1999. Its goal is to help industrial businesses deal with the rise in oil prices, so that they can continue their production, in a different, sustainable way.

Based on the tried and tested principle of industrial fermentation, METabolic EXplorer's solutions replace today's petrochemical processes with the use of a wide range of plant-based raw materials. By optimizing the metabolic yield of non-pathogenic bacteria in a contained, controlled environment, the company facilitates the production of chemical compounds used in a wide range of everyday goods (textile fibres, paints, solvents, plastics and animal feed).

METabolic EXplorer is currently focusing its alternative processes on the production of three compounds that together have an estimated, annual, end-market value of €7 billion. The company's strategy will be implemented through industrial partnerships in the shape of joint ventures and licences, as well as own-account production units.

METabolic EXplorer, based in Clermont-Ferrand, France, is listed on NYSE Euronext in Paris (Compartment C, METEX) and is part of the CAC Small index.
